Voxer Installation Instructions

Installation

Voxer is available both for Android devices with OS 6+ and for any iPhone, iPod touch, or iPad that is running iOS 10+. Sign up for a Voxer account by following a few simple steps:

1. Download Voxer  onto your device from the App Store (iPhone) or from Google Play (Android).
2. After you have downloaded Voxer, open the app on your phone.
3. At the log in screen, tap either Sign Up, Log in or Log in with Facebook.
 - If you select Sign Up, you'll enter your e-mail address, a password, your first and last name, and phone number to match with your friends on Voxer. Also, be sure to check out our [Getting Started Tips](#).
 - Users can also login through Facebook. If you login with Facebook your Voxer profile will show your Facebook profile picture and name. To do so on iOS, select Log in with Facebook at the login screen. To do so on Android, select Log in > Facebook Log In

Note: Logging into Voxer with Facebook will be a single sign on action. Facebook no longer allows Voxer to access your Facebook friends list, and so Voxer will not be able to match you with your Facebook friends who log into Voxer with Facebook.
